

Chief Technology Officer Powerdale

Company

<https://www.powerdale.com>

Role purpose

The CTO supports the vision, strategy, design and drives execution of the hardware and software products of Powerdale.

Management of a Team of 10 direct & 20 indirect reports - reporting to the CEO.

(S)He drives the product managers (PM) and the development capacity groups (CG) towards efficient delivery of products and customer projects.

The CTO supervises the planning and the execution of the various development projects.

(S)He is also in charge of the planning of the development groups (capacity planning), balancing and structuring of:

- Product Priorities
- Customer Projects
- Customer Support
- Technology Roadmap

The CTO is responsible for the product planning and execution throughout the Product Lifecycle, coordinating the PM and the CG : therefore (s)he is part of the management team working closely with PM, CG, finance, sales, marketing and support to ensure revenue and customer satisfaction goals are met.

The CTO job also includes ensuring that the product supports the company's overall strategy and goals.

You can see this person as a conductor of an orchestra, neither player nor composer but aware of all instruments in the orchestra and of the score.
